

Deepkumar Chadamiya

Product Designer | Design Engineer | Front-End Developer

Tempe, AZ | deeppatel8904@gmail.com | (480) 572-6950 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Summary

Product Designer and Design Engineer with 4+ years building digital products across professional, academic, and independent work. Experience spans product design, UI/UX, frontend development, design systems, game technology, data visualization, and AI-powered products. Comfortable taking ideas from research and user flows through prototypes, responsive interfaces, production code, APIs, testing, and deployment.

Design & Technical Skills

Product & UX: Product Design, UI/UX Design, User-Centered Design, Interaction Design, Information Architecture, User Flows, Wireframing, Prototyping, User Research, Usability Testing, Accessibility, WCAG

Design Systems & Tools: Figma, Framer, Design Systems, Component Libraries, Auto Layout, Variables, Design Tokens, Responsive Design, Data Visualization

Development: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Angular, Node.js, Java, REST APIs, Supabase, PostgreSQL, Git, GitHub Actions, Vercel

AI & Prototyping: LLM Integration, Gemini API, Claude Code, Structured Outputs, AI-Assisted Prototyping, Workflow Automation, Human-in-the-Loop Workflows, Playtesting

Experience

Software and Game Development

Endless Games Studio, Mesa, AZ

Aug 2026 to Present

- Support software and game development across lab programs through prototyping, coding support, playtesting, feature testing, bug documentation, and technical troubleshooting.
- Assist with development environments, builds, demo stations, workshops, and events while helping students and participants solve technical problems during hands-on projects.
- Collaborate on game development and special projects, including Endstar platform support, while identifying technical issues and communicating project risks to the team.

Design Technology Teaching Assistant / Database Assistant

Arizona State University, Tempe, AZ

Oct 2024 to Dec 2025

- Assisted design students with digital tools, prototyping, visual communication, portfolio development, and technical implementation, helping connect design ideas with practical technology.
- Designed Airtable systems with linked records, structured fields, views, and automated workflows, reducing manual processing time by 60% across 3 academic datasets.
- Built 6 Power BI and Tableau dashboards across 5+ programs, turning enrollment, academic standing, and graduation data into clear visual reports for faculty and staff.

Software Developer Intern / Full-Stack Software Developer

Tibicle LLP, Ahmedabad, India

Jan 2022 to Nov 2023

- Worked across product, design, and engineering on 3 SaaS and EdTech products, turning requirements and interface concepts into responsive applications using Angular, TypeScript, Java, REST APIs, and relational databases.
- Built reusable UI components, forms, dashboards, navigation, and role-based workflows for platforms supporting 500+ users, improving consistency and usability across product interfaces.
- Improved frontend architecture, state management, and API performance, reducing page load times by 40%; rebuilt third-party integrations and reduced integration defects by 60%.

Selected Product & Design Work

CreatorFlow | AI Workspace for Creators | *Product Design, React, Next.js, TypeScript, Supabase, AI*

[GitHub](#)

- Designed and built a full-stack creator platform for sponsorship management, content planning, analytics, AI-assisted repurposing, automation, and team collaboration.
- Defined information architecture, user flows, responsive interfaces, reusable UI patterns, and role-based experiences across 5 user roles, then implemented them in React and Next.js.
- Built authentication, PostgreSQL RLS, permissions, Edge Functions, and Gmail and YouTube API integrations connecting real creator data with AI and automation workflows.

C.A.R.E. for Horses | UX Research & Website Redesign | *UX Research, UI/UX Design, Prototyping, Accessibility*

- Conducted surveys, heuristic evaluation, competitive analysis, personas, and journey mapping to identify navigation, usability, accessibility, and content problems.
- Used findings from 16 survey responses to redesign information architecture, user flows, page hierarchy, and interaction patterns around clearer user tasks.

ACM | AI Content Publishing System | *TypeScript, Gemini API, PostgreSQL, GitHub Actions, Vercel*

[GitHub](#)

- Designed and built an AI workflow for trend discovery, source-backed research, content generation, editorial review, human approval, publishing, and deployment verification.
- Built structured LLM workflows with Gemini API, Zod validation, PostgreSQL state, retry handling, approval gates, and resumable automation.

Education

Arizona State University

Master of Science in Information Technology, GPA: 4.0/4.0

Tempe, AZ

Dec 2025

Vidush Somany Institute of Technology and Research

Bachelor of Engineering in Computer Engineering, GPA: 8.95/10.0

India

Apr 2023
